Problem-Solving Application
Use a Bar Graph

The graph on the right shows the number of radio stations in the United States that follow four popular formats. Which format has the most stations? How many radio stations in the United States follow that format?

1. What facts do you need to answer the questions?

__________________________________________________________________________

__________________________________________________________________________

__________________________________________________________________________

2. How can you use the bar graph to solve the problem?

__________________________________________________________________________

3. Write the solution to the problem in complete sentences.

__________________________________________________________________________

__________________________________________________________________________

__________________________________________________________________________

4. Could you have solved the problem without using the bar graph? Explain.

__________________________________________________________________________

__________________________________________________________________________
