Prime and Composite Numbers

In the table below, list the factors for each number. Use counters if you wish. Tell if the number is prime or composite.

<table>
<thead>
<tr>
<th>Numbers</th>
<th>Factors</th>
<th>Prime or Composite</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. 33</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. 18</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3. 35</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4. 28</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5. 17</td>
<td></td>
<td></td>
</tr>
<tr>
<td>6. 40</td>
<td></td>
<td></td>
</tr>
<tr>
<td>7. 9</td>
<td></td>
<td></td>
</tr>
<tr>
<td>8. 19</td>
<td></td>
<td></td>
</tr>
<tr>
<td>9. 25</td>
<td></td>
<td></td>
</tr>
<tr>
<td>10. 37</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

11. Which of the following numbers in the square are prime?

A 7, 14, and 2
B 3, 2, and 16
C 2, 3, and 7
D 16, 14, and 8

12. List all the numbers between 30 and 40 that are composite.
