Customary Units of Capacity

**Solve**

1. A recipe calls for 4 pints of milk. How many times must you fill a 1-cup measuring cup to equal 4 pints?

2. Virginia bought 3 pints of orange juice for $1.00 each. Mark bought 1 gallon of orange juice for $7.00. Which is the better buy?

3. A pudding recipe makes 7 cups of pudding. Will a 1-quart container be large enough to hold the pudding? Why or why not?

4. Brad read that you should drink at least 2 quarts of water a day. Yesterday he drank 3 cups in the morning, 1 quart in the afternoon, and 1 pint in the evening. Did Brad drink at least 2 quarts of water? Explain.

**You Decide** Container A can hold 9 cups of liquid. Container B can hold 5 pints of liquid. Container C can hold 2 quarts of liquid. Which container has the greatest capacity? Explain.
