Frequency Tables and Histograms

Use the histogram to solve.

United States Presidents, Age at Inauguration

1. How many presidents were between the ages of 56 and 60 at the time of their inauguration?

2. Monika is summarizing the data. She writes, “More than half of the Presidents of the United States were over 55 years old when they took the job.” Do you agree? Why or why not?

3. If this histogram were redrawn with three intervals instead of six, how many presidents would be included in the third interval?

4. What does the shape of the histogram tell you about the ages at which presidents took office?
