Sentence Detectives

Objective
To identify complete sentences

Players
2–4

You will need
24 index cards for game cards, pencils or pens

Before you play
- Players work together to make game cards like the ones pictured. Half the cards should be sentences. The other half should have missing subjects or missing predicates. All cards should have answers on the back. Cards should be stacked faceup.
- Players choose one person to be the judge and scorekeeper.

How to play
Players take turns picking a card, reading it aloud, and saying whether it is a sentence or not. If it is not a sentence, the player must tell whether the subject or the predicate is missing.

Scoring
The scorekeeper records points. A player scores one point if he or she says the card is a sentence and it is. If the card is not a sentence, the player must tell whether the subject or predicate is the missing part to get a point.
