How to make: Title the bulletin board, “Park the Cars.” Cut out the silhouette of a city skyline and roads. Add other elements that suggest a city scene. Write all Basic Words from Units 31–35 on different-colored car cutouts, omitting the singular Basic Words from Unit 31. Attach the cars randomly to the streets with pushpins. Gather six boxes or berry baskets, and attach a garage shape to the front of each. Label the garages as shown, and fasten them across the bottom of the board.

How to use: Have children play a sorting game with the cars. Working with a partner or in small groups, children can remove each car from the street and store it in the appropriate garage. To encourage children to check their work at the end, write the correct garage number on the back of each car.
