Moon Phases

Steps

1. **Use Models** Place a lamp on a table in a darkened room. The lamp is the Sun. One child sits in a chair as Earth. One child holds a model Moon.

2. **Observe** The Moon slowly walks around Earth. Earth observes the changes in the amount of light on the Moon.

3. **Record Data** On the Moon chart, Earth records how the light and shadows on the Moon model change.

Think and Share

1. When did you see most of the Moon model?

**Work Together** Switch roles so that everyone has a turn to be Earth. Compare your results. Talk about how the Moon seemed to change.
