Section 6 Assessment

Vocabulary
Write the word that goes with each definition.

1. An object in space that makes its own heat and light
   __________

2. A group of stars that forms a pattern in the sky
   __________

Stars at Night
The diagram shows a constellation at 10 P.M in the summer.

3. If you looked at the constellation again at 12 midnight, what changes would you expect to see? Explain.
   __________

Time Dial
Use the time dial and star map to answer these questions. Imagine it is April. The Big Dipper is “upside down” in the sky.

4. What time is it?
   __________

5. What letter does Cassiopeia look like at this time? ________
