   __________________________________________
   __________________________________________
Look at the picture below. It shows the life cycle of a fruit fly. Write the name of each stage next to its picture. Use the words in the box.

- pupa
- adult
- larva
- egg

Which of the stages shown in the picture eats a lot and grows rapidly?
Sort the vegetables into two groups. One group is Fruits. The other group is Not Fruits. Put the Fruits into one of the plastic trays. Put the Not Fruits into the other plastic tray.

How did you decide if a vegetable was a fruit or not a fruit?

Your teacher will ask you to measure the length of one vegetable. Measure the vegetable and write your measurement here.

____ cm
