

# Find Area

You can find the area of a figure by counting the number of square units that cover the figure.  
Each  $\square$  is one square unit.

**The area of the figure is 9 square units.**

You can also find area on a geoboard.

Each  $\begin{matrix} \cdot & \cdot \\ \cdot & \cdot \end{matrix}$  is one square unit.

**The area of the figure is 6 square units.**

Find the area of each figure. Label your answer in square units. Each  $\square$  or  $\begin{matrix} \cdot & \cdot \\ \cdot & \cdot \end{matrix} = 1$  square unit.
